

MORE KNOWLEDGE. MORE PROFICIENCY. MORE EFFICIENCY.

Increase your competence with the Alpine Campus

HOSOKAWA ALPINE

Process technologies for tomorrow.

ALPINE CAMPUS STANDS FOR **FIRST-HAND KNOW-HOW**

LEARN FROM THE MARKET LEADERS – WHAT COULD BE BETTER?

Your decision in favour of one of our systems constitutes an excellent choice since our grinding and classifying systems have the highest technical standards. But as your partner, we are not satisfied until you can make optimal use of the entire potential of your system. Because the more conversant you are with our systems, the higher your degree of efficiency in using them. And that's why with the Alpine Campus, we offer you process- and system-specific training courses – tailored exactly to your requirements and applications.

YOUR ADVANTAGES AT A GLANCE

» QUALIFIED SPECIALIST KNOWLEDGE

Our seminars are held by experienced trainers. They are highly qualified and undergo further training on a regular basis. The individual training modules are attended by Alpine experts. They share their experience and offer solutions which you can implement immediately. This combination ensures a sustained transfer of knowledge.

» PARTICIPATION CERTIFICATE

You receive a certificate of participation for the knowledge you have acquired in the seminars. The acquired know-how is both a reference for yourself as well as for your company.

» INDIVIDUAL LEARNING MODULES

With our training package, learning becomes an integral part of your work. And conversely, the experience gathered at the workplace forms an integral part of our modules. Practical experience plays a decisive role and is accompanied by theoretical principles: the learning module 70:20:10 enables us to ensure the sustained success of your learning process.

» FLEXIBLE SEMINAR LOCATION

You choose the location of your training: either on site, at the Alpine Campus or via webinar. We offer you constant high quality regardless of the location – anywhere in the world.

ALPINE CAMPUS STANDS FOR **HANDS-ON LEARNING**

The efficiency speaks for itself

The Alpine Campus meets you at your exact level of knowledge and imparts exactly the specialist know-how to match your needs. With our training courses, you can increase your competence and thus the efficiency and quality of your work – added value at its best.

Convincing in sum total

All our training modules are tailored exactly to your individual requirements and are thus very effective. Theory and practice go hand in hand. Our course modules are supplemented in addition by machine and system tests. In order to make participation in the training courses as simple as possible for you, you can choose whether you want to complete them on site in your own company, at the Alpine Campus or per webinar.

NO QUESTION ABOUT IT:

Alpine Campus helps you to optimise the efficiency of your system.

ALPINE CAMPUS STANDS FOR MORE KNOWLEDGE TRANSFER

Practical know-how leads to success

You've always known it: ongoing personnel training pays off. It's therefore a good idea to benefit from the many advantages of the Alpine Campus for your personnel:

- › Receive information on developing and refining process and machine solutions
- › Exchange information with our machine and system experts for your applications
- › Familiarise yourself with process- and system-technological topics more quickly

IN A NUTSHELL:

Fast and in-depth attainment of all requisite qualification targets by your personnel.

The advantages are impressive

- › You can optimise your system and its output as a result of your increased knowledge
- › You will find out about new products and can use this information to optimise your own systems
- › The operation, maintenance and servicing of your systems becomes safer and more efficient

THE EFFECT:

A tangible added value results from the knowledge gained in the training courses.

» Our conviction is that an increase of customer satisfaction goes hand in hand with practice-oriented and individualised training courses.«

NORBERT GEBEL
HEAD ALPINE CAMPUS

ALPINE CAMPUS STANDS FOR TAILOR-MADE TRAINING COURSES

Flexibility is the key

The demands placed on our systems differ from company to company. Which is why we have no standard training courses. Instead, we respond individually to your problem specification and requests and offer our support exactly there where you have already discovered the need for a solution or want to optimise the work process.

70:20:10 BRINGS MAXIMUM LEARNING SUCCESS

You receive optimum support from our trainers, all of whom were trained according to methodical-didactic concepts. We achieve maximum learning success with the 70:20:10 learning model, i. e. the practical experience, study and application of what has been learned are paramount.

CLASSIC, FORMAL LEARNING

10%

by means of traditional further training such as e.g. books and seminars.

LEARNING IN DIALOGUE

20%

by means of the professional environment, the cooperation and the coaching by supervisors.

INFORMAL LEARNING

70%

by means of specific tasks and professional challenges.

THEORY AND PRACTICE FROM A SINGLE SOURCE

The training units are broken down into smaller modules in which not only the theory is dealt with, but also and above all practice-related exercises. Because the more you become involved in developing your own solutions, the more effective learning is.

A group of nine diverse people of various ages and ethnicities are arranged in a circle, leaning in and stacking their hands in the center. They are all smiling and looking towards the camera. The background is plain white.

PARTICIPANT-ORIENTED

Every participant is asked what he or she expects from the training course. There is always enough time during the training course to deal flexibly with individual requests.

ATTRACTIVE LEARNING FORMATS

Our learning formats consist of presentations and short lectures, training videos, quiz questions, practical tests with pilot plants, checklists, demonstrations with machines and systems, the supervised installation and removal of critical components and workshops.

PRACTICAL TESTS

Our course modules are supplemented by machine and system tests which cover a wide range of applications. The system parameters for the tests are defined by the seminar participants themselves. And it is okay to make mistakes here, because one always learns more from mistakes.

PARTICIPANTS – TRAINERS – EXPERTS

Experts always offer support during the individual training modules. They share their experience and offer solutions which can be implemented immediately by the seminar participants. As a result, a profound understanding evolves and thus the possibility of entering into in-depth machine-, system- or branch-specific discussions. A combination which guarantees a sustained transfer of knowledge.

IN THE SEMINAR ROOM OR DIRECT AT THE MACHINE

The optimum learning location depends on the learning target and the participants. The training courses are ultimately aimed to increase professional competence.

OUR TRAINING COURSES ARE

- » PRACTICE-ORIENTED
AND TANGIBLE
- » TAILOR-MADE
- » TO SUIT VARIOUS NEEDS
- » HELD BY EXPERIENCED
TRAINERS AND EXPERTS
- » GLOBALLY AVAILABLE

Are you interested in taking part in our in-depth training courses and being able as a result to optimise your grinding and classifying systems? If you are, simply contact us – we will be glad to provide further information under campus@alpine.hosokawa.com
